

Washington Section 1332 Waiver Information

- The state of Washington has been a leader in exploring innovative ways to increase access, improve quality, and reduce the number of Washington residents who lack coverage.
- On May 13, Washington submitted the Section 1332 State Innovation Waiver that will provide access to federally non-subsidized health and dental coverage through *Washington Healthplanfinder* to all Washington residents, regardless of immigration status, starting in plan year 2024.
- The Section 1332 Waiver will also allow newly eligible customers, up to 250% FPL, access to Cascade Care Savings (state premium assistance starting plan year 2023).
- The waiver application meets federal waiver requirements by offering comprehensive, affordable coverage to more people without increasing the federal deficit.
- Nearly 25% of Washington’s uninsured population cannot obtain coverage through *Washington Healthplanfinder* due to their immigration status. By decreasing the number of uninsured, addressing health disparities, strengthening the individual market, and improving health care affordability, this waiver takes an important step forward in addressing health equity.

Washington Section 1332 Waiver’s effect on premiums, enrollment, and federal deficit					
	2024	2025	2026	2027	2028
Premiums	-0.25%	-0.27%	-0.33%	-0.34%	-0.34%
Individual Market Enrollment	1.1%	1.3%	1.3%	1.3%	1.4%
Federal Savings (\$ millions)	\$1.7	\$2.0	\$2.2	\$2.4	\$2.6

More than 105,000 Washington state residents are ineligible for health care coverage due to federal restrictions. Washington's Section 1332 waiver, if approved, will lower that number substantially.

Broad support for WA's Section 1332 Waiver

Unanimous support from health industry partners

America's Health Insurance Plans (AHIP) writes today to express support for Washington's waiver to allow all Washington residents to purchase qualified health and dental plans (QHPs and QDPs) through the Exchange, regardless of immigration status... AHIP strongly supports this expansion, which will improve the sustainability and affordability for all members of the individual market.

On behalf of the **Association of Washington Healthcare Plans (AWHP)**, representing 13 companies offering health insurance coverage to over 7 million Washington residents, we are writing to offer our enthusiastic support. ... Expedient federal approval ... is needed to ensure system updates and community engagement and outreach efforts can be completed in advance of Plan Year 2024 Open Enrollment...

Hospitals are particularly pleased that this waiver is projected to increase access to primary and preventive care, as well as treatment for chronic disease, reducing preventable hospitalizations. Coverage will also reduce the amount of uncompensated care in Washington by allowing those without another coverage pathway to enroll in a QHP or QDP. Robust health insurance coverage is a crucial component of access to high quality health care.

-Washington State Hospital Association (WSHA)

The Section 1332 Waiver is another step toward expanding access to care, particularly among communities who have been historically excluded... Without affordable health care coverage options, these Washington residents are more likely to have a poor health status from worsened health conditions and forgo care until it becomes an emergency, leading to hospitalization for preventable conditions and more acute illnesses.

-Washington State Medical Association (WSMA)

Advancing equity for Washington residents

Community Health Plan of Washington was formed by Washington's community health centers 30 years ago, specifically to serve individuals who were traditionally denied access to quality health coverage... We support the State's 1332 Waiver application for several reasons, but primarily because it creates equity for our state's residents and helps reduce health disparities across communities.

The **Washington State Nurses Association (WSNA)** appreciates this opportunity to comment in strong support of Washington's Section 1332 Waiver Application draft to improve access to affordable health coverage for more Washington residents... WSNA is a strong supporter of improving equity in our health care system. We believe that this waiver is an important step towards that goal.

On behalf of the **Washington Association for Community Health** ... [we] write in strong support of the waiver as one of the most promising opportunities to expand health coverage for Washington residents since the passage of the Affordable Care Act. ... Our health centers value innovation, and it is especially crucial now as the pandemic exacerbates already existing disparities.

Local support from across the state

The **Tri-Cities Immigrant Coalition (TCIC)** is a non-partisan community based group working to build trust and understand within our community about the issues facing our Tri-Cities immigrants. ... Many in our community are structurally excluded from affordable health coverage. Left with no recourse, many of these community members currently forego needed care until it becomes an emergency. As you know, without insurance, people are more likely to have poor health status, be hospitalized for preventable conditions and acute illnesses.

We need a health insurance option for all members of our communities, regardless of immigration status. In Washington today, over 100,000 immigrants go without critical health care because they are structurally excluded from affordable health coverage.

-Kitsap Immigrant Assistance Center (KIAC)

Through the waiver and other state policy solutions, Washington will make significant progress toward meeting the basic health care needs of all Washingtonians, which will make every community healthier and our economy stronger.

- Jefferson County Immigrant Rights Advocates

Strengthening Washington's economy

The **Economic Opportunity Institute** is a non-profit, non-partisan think tank that has been advocating for family economic security and affordable health coverage for over 20 years. Expanding immigrant health coverage through pathways such as this waiver is one of our top priorities because we understand that affordable access to health care is a vital component of a well-functioning health care system and a strong economy.

[We] write in strong support of WA Health Benefit Exchange's Section 1322 Waiver Application... When our patients lack coverage, they put off preventative care, decompensate and ultimately enter our health care system sicker with preventable conditions. The costs to our State and our healthcare system are immense, and the costs to patients and families is immeasurable.

-SEIU 1199NW

NoHLA (Northwest Health Law Advocates) has advocated to expand health coverage for all Washingtonians for over two decades:

- The waiver would allow our state to remove federal barriers to health coverage, offering all Washington residents the same opportunity to purchase Qualified Health Plans and Qualified Dental Plans.
- The waiver would also permit our state to invest state funds toward more affordable coverage for low-income residents, with no impact to the federal deficit.
- The waiver would improve health equity, addressing one of the root causes of the disproportionate uninsurance rates and poorer health outcomes many of Washington's communities of color face today.
- The waiver would improve the broader individual insurance market by lowering premiums and reducing application barriers that prevent families from applying for coverage together.
