- Committed to working with the Insurance Commissioner on solutions to present to Legislators

Themes of 2018 Exchange Health Plan Filings

- Filings reflect the uncertainty at the federal level – no decision on CSRs and enforcement of mandate
- Carriers reacting to the market and cost trend
- While carriers have filed, plans still in flux
- HMO models offered by traditional Medicaid MCOs are more dominant
- Exchange will likely have a greater portion of the individual insurance market
- Significantly fewer choices of carriers in many counties; several with one or no choices

Addressing 2018 Plan Issues

- Working with OIC on addressing bare counties
- Cost-sharing reduction (CSR) uncertainty continues
- Working with customers in discontinued plans to ensure seamless Exchange coverage
- Ongoing consumer communication in a changing federal environment

Market Stability in 2019 and Beyond

- Working with OIC on developing risk stabilization program with goals of: stabilizing market, sustain affordability, and provide access in rural areas
- Looking at options, such as reinsurance, high-risk pool, state as a purchaser, geographical rating areas, etc.
- Objective to encourage greater county participation
- Intention to pair with 1332 waiver (ACA waiver) to leverage federal funding for the program
- Targeting 2019 start date
